Education

MTech (Artificial Intelligence) <i>Indian Institute of Technology</i> Relevant Courses: Machine Learning, Artificial Intelligence, Mathematics & Autonomous Systems.	Jodhpur, India 2025 – Present
BTech (Computer Science and Engineering) <i>Graphic Era Hill University</i> Relevant Courses: Computer Architecture, Compiler Design, Operating System, Databases, Computer Networks, Engineering Mathematics & Data Structure and Algorithm.	Dehradun, India 2019–2023
10+2/Intermediate <i>St. Kabeer Academy</i> Relevant Courses: Physics, Chemistry, Mathematics & Computer Science.	Dehradun, India 2018–2019
10th Grade <i>St. Theresa's School</i>	Srinagar(Garhwal), India 2016–2017

Skills

- Programming:** Python, SQL, Java, C++, JavaScript
- AI/ML:** Machine Learning, Deep Learning, NLP, Generative AI, LLMs, Recommendation Systems, Time Series Forecasting, Feature Engineering, Computer Vision
- Frameworks & Libraries:** PyTorch, TensorFlow, Keras, HuggingFace Transformers, LangChain, Scikit-learn, Pandas, NumPy, OpenCV, PySpark, Apache Spark, Streamlit
- Web:** React.js, HTML, CSS, Node.js
- Platforms & Tools:** Git, GitHub, Linux, Jupyter Notebook, VS Code, Heroku, Docker
- Core CS:** DSA, OOP, Operating Systems, DBMS, Computer Networks

Experience

Python Developer (ML Engineering) <i>Cruxsphere Technologies Pvt. Ltd.</i> - Designed and implemented end-to-end data preprocessing pipelines using Python, Pandas, and NumPy, improving data quality and consistency for downstream ML workflows. - Built and automated SQL-based data pipelines and reporting scripts, significantly reducing manual effort and improving processing efficiency across analytics workflows. - Optimized data preprocessing scripts and debugging workflows, enhancing scalability of AI/ML application development and reducing pipeline execution time.	India 04/2024 – 10/2024
Front-End Developer <i>Behere Elite Technologies</i> - Developed and deployed responsive, cross-browser compatible web applications using React.js, HTML, CSS, and Node.js, improving user experience across multiple devices. - Collaborated with backend teams to integrate RESTful APIs, contributing to seamless data flow between front-end interfaces and server-side services.	Delhi, India 06/2023 – 03/2024

Projects

Distributed Recommendation System using Apache Spark MLlib ALS

[GitHub](#)

Jodhpur, India

02/2026 – 04/2026

- Architected a scalable distributed recommendation system using Apache Spark, PySpark, and Spark MLlib's ALS algorithm for collaborative filtering on large-scale datasets.
- Implemented end-to-end Spark-based preprocessing and ALS model tuning using Spark DataFrames, optimizing recommendation quality and generation speed.
- Deployed the pipeline via Streamlit and evaluated performance using RMSE, Precision@K, and Recall@K, achieving robust recommendation accuracy across user segments.

Time Series Energy Consumption Forecasting

[GitHub](#)

Jodhpur, India

09/2025 – 11/2025

- Built an end-to-end time series forecasting pipeline to predict India's hourly electricity demand, leveraging deep learning and classical ML models.
- Implemented and benchmarked LSTM, XGBoost, Random Forest, and Linear Regression models, selecting the best-performing model based on MAE and RMSE metrics.
- Engineered temporal features, conducted error analysis, and utilized GPU-accelerated training to reduce model development time significantly.

Face Recognition based Attendance System

[GitHub](#)

Dehradun, India

03/2022 – 10/2022

- Developed an automated face recognition attendance system using Python, OpenCV, NumPy, and CNN-based deep learning models, eliminating manual attendance tracking.
- Optimized image processing workflows, reducing processing time and improving overall system performance by approximately 40%.
- Integrated data privacy and integrity measures, ensuring secure and tamper-proof attendance management across user sessions.

Publication

Movie Recommendation System Using TF-IDF Vectorizer and Bag of Words

DOI: [10.1109/SMART59791.2023.10428182](https://doi.org/10.1109/SMART59791.2023.10428182)

[IEEE Publication](#)

Achievements

- Graduate Aptitude Test in Engineering [GATE] [Computer Science] qualified.
- Graphic Era Hill University Achiever's Award Recipient (2023).
- Co-Founder and ex-President of Cyber Security Club of Graphic Era Hill University.
- Led team to 4th position in Devbhoomi Cyber Hackathon [All India] against 500+ teams.
- Achieved top 565 rank on HackTheBox [Globally].
